Chanchal Soni

Frontend Developer(React)

Professional Summary

Dynamic Frontend Developer with expertise in React.js, possessing excellent problem-solving skills and agility in learning new technologies like Generative AI. Skilled in developing high-quality, responsive, and scalable user interfaces. Strong collaborator, adept at enhancing development processes and delivering exceptional user experiences.

Experience

- | | | |
|---------------------------|-----------------------|-----------------------------|
| Physics Wallah | Frontend Developer | July 2023 - January 2025 |
|---------------------------|-----------------------|-----------------------------|
- Developed and optimized interactive admin panels and customer support tools for PW Admin and Help Centre, significantly enhancing user experience and engagement.
 - Designed a notice board system for real-time admin updates, which successfully reduced support ticket volume by 30%, showing efficiency in problem-solving.
 - Built an Admin Config System that streamlined content management via advanced filtering and course cloning, proving adeptness at creating scalable solutions.

Projects

- | | | |
|--------------------------------|--------------------------------|----------------------------------|
| Urban Company App-Clone | Live Demo Link | Github Repo Link |
|--------------------------------|--------------------------------|----------------------------------|
- JavaScript HTML5 CSS3
- Developed landing page and service pages with HTML, CSS, and JavaScript.
